### **WATCHMAN Left Atrial Appendage Closure Device with ...**

What is the Watchman Device (Also known as Watchman Procedure, Watchman Heart Procedure or Watchman Implant)? The Watchman Device is a small implant placed in to the heart that can reduce the risk of stroke in patients with atrial fibrillation. Patients with atrial fibrillation are at increased risk of stroke, mainly due to clots that form in a small chamber in the top of the heart known as the left atrial appendage.

### **Watchman Device - Explained and FAQ's Answered by a ...**

The safety and effectiveness (and benefit-risk profile) of the WATCHMAN FLX Device has not been established in patients for whom long-term anticoagulation is determined to be contraindicated. The LAA is a thin-walled structure. Use caution when accessing the LAA, and deploying, recapturing, and repositioning the Closure Device.

### **WATCHMAN FLX™ | WATCHMAN Device**

What is the WATCHMAN™ device? The WATCHMAN™ left atrial appendage (LAA) closure implant is a permanent heart implant used to treat atrial fibrillation (afib) not caused by a heart valve problem. With afib, the heart's two upper chambers (atria) beat irregularly.
