For the 2018 edition of the Guidelines for Design and Construction documents, the Facility Guidelines Institute developed three books: a volume for hospitals, a new volume for outpatient facilities, and the volume for residential health, care, and support facilities. Each provides basic information on planning, design, construction, and commissioning as well as minimum design requirements for ...

2018 Edition - FGI - Facility Guidelines Institute

The Department believes that the extension of time to 4 hours of surgery and 4 hours of recovery, for surgery to be considered ambulatory surgery, is appropriate for the following reasons. First, the reason for extending the surgery time, but not the recovery time, is due to the development of newer anesthetic agents which enable surgeons to conduct longer periods of surgery.

Pennsylvania Bulletin

AIA guidelines prohibit U.S. hospitals and surgical centers from shutting down their HVAC systems for purposes other than required maintenance, filter changes, and construction. 120 Airflow can be reduced; however, sufficient supply, return, and exhaust must be provided to maintain required pressure relationships when the space is not occupied. Maintaining these relationships can be accomplished with special drives on the air-handling units (i.e., a variable air ventilation [VAV] system).
