Part one covers the main principles and theories of colour, focusing on the human visual system and the psychology of colour perception.

### **Colour Design: Theories and Applications by Janet Best ...**

Colour theory breaks down how and why to use a specific colour or colour palette in a design. It explains why colour can be a very powerful tool; how it can entice or persuade, create a specific emotion or convince someone of something. For example, the colour red can be associated with passion or strength—they demand attention.
