One more thing, diesel engine oils contain anti-foaming agents which are unique to these types of engines. Given that diesel-rated engine oils have higher SAE ratings and contain more additives such as anti-foaming agents and detergents, things that petrol engines don't need, it is safe to say that you should

never put diesel rated oils into your gas engine.

## **Ultimate Guide to Engine Oil - Carbibles**

Because diesel fuel is sometimes called diesel oil, be aware that the oil you have to change is not the fuel oil but the oil that lubricates the engine. This job requires lubricating oil that's specially designed for diesel engines — not gasoline engines. After you understand that distinction, the actual work involved is the same as it is for conventional vehicles except that you have to do the task more often on a diesel.
