Financialisation In Crisis

The crisis commenced in the sphere of finance, spread to production, and then became a world recession. Its unusual character is apparent since never before has a global economic crisis been triggered by banks lending to workers to buy houses. Moreover, state intervention to forestall the crisis becoming a major depression has been unprecedented.

Financialisation in Crisis (Historical Materialism Book ...

The ongoing economic crisis commenced in the sphere of finance, spread to production, and then became a world recession. In this important and timely volume several well-known political economists draw on the insights of Marxist and other heterodox economics to argue that the turmoil of 2007-2009 represents a crisis of financialised capitalism, and is thus systemic.

The Crisis of Financialisation in Ireland | The Economic ...

Financialization is a term sometimes used to describe the development of financial capitalism during the period from 1980 to present, in which debt-to-equity ratios increased and financial services accounted for an increasing share of national income relative to other sectors. Financialization describes an economic process by which exchange is facilitated through the intermediation of financial instruments. Financialization may permit real goods, services, and risks to be readily exchangeable fo

Financialization - Wikipedia

In the 20 years before the Great Financial Crisis, debts and 'financial excess' — in the form of the asset price bubbles in 'New Economy' stocks, real estate markets and commodity (futures) markets — propped up aggregate demand and kept the US and global economies growing.

FINANCIALISATION IN CRISIS (HISTORICAL MATERIALISM BOOK ...

Regarding the second aim, the paper argues that the 'financialisation' perspective in general, and the concept of 'financial chains' in particular, provide useful insights into the crisis and its uneven effects, by shedding light on the complex web of flows of value and power relations established/emerging between the prospective winners and losers.

Winners And Losers In Coronavirus Times: Financialisation ...

By Dr Kalim Siddiqui. Financialised capitalism emerged in the advanced economies during the last four decades. It has opened wider avenues to wealth formation and speculation, as well as caused the recent financial crises and the rising levels of income inequality. In this article, the author discusses the impact of financialisation and neoliberalism on the current state of the global economy.

Financialisation, Neoliberalism and Economic Crises in the ...

The crash of 2008 was a structural crisis of the financial capitalist model. And the malaise into which the global economy, and particularly the economies of the Global North, has sunk since then is a result of the failure to paper over the contradictions of the old model or move onto something new.

The Latest Incarnation of Capitalism

Over the past three decades studies on financialisation have rightly focused on the emergence of the financial sector as the new economic vortex in advanced industrial societies. Like a veritable centre of gravity, it has sucked capital investment from other sectors and re-calibrated their orbits to the point that some resemble dying stars.
