IVF in the Medically Complicated Patient A Guide to Management, Second Edition Edited by Nick S Macklon, MB ChB, MD, FRCOG, Professor of Obstetrics and Gynaecology, Academic Unit of Human Development and Health/Faculty of Medicine, University of Southampton, and Director, Complete Fertility Centre Southampton, Princess Anne Hospital, Southampton, UK

Second Edition A Guide to Management,

In vitro fertilization (IVF) is a complex series of procedures used to help with fertility or prevent genetic problems and assist with the conception of a child. During IVF, mature eggs are collected (retrieved) from ovaries and fertilized by sperm in a lab. Then the fertilized egg (embryo) or eggs (embryos) are transferred to a uterus.
