Example 3. Identify the Brønsted-Lowry acid and the Brønsted-Lowry base in this chemical equation.  $C_6H_5OH + NH_2^- \rightarrow C_6H_5O^- + NH_3$ . Solution. The  $C_6H_5OH$  molecule is losing an  $H^+$ ; it is the proton donor and the Brønsted-Lowry acid. The  $NH_2^-$  ion (called the amide ion) is accepting the  $H^+$  ion to become  $NH_3$ , so it is the Brønsted-Lowry base.. Test Yourself

Examples will be drawn from astronomy, biology, sports, and current events. PHYS 1A and 1AL are designed to be taken concurrently but may be taken in separate terms; taking the lecture before the lab is the best alternative to enrolling in both. Students continuing to PHYS 1B/1BL will also need MATH 10B or 20B. Prerequisites: MATH 10A or 20A ...
