LCL 469: Find in a Library. View cloth edition. Print. Email. Marcus Manilius, who lived in the reigns of Augustus and Tiberius, is the author of the earliest treatise on astrology we possess. His *Astronomica*, a Latin didactic poem in five books, begins with an account of celestial phenomena, and then proceeds to treat of the signs of the zodiac and the twelve temples; there follow instructions for calculating the horoscoping degree, and details of chronocrators, decans, injurious degrees, ...

Manilius, Astronomica | Loeb Classical Library

The *Astronomica* of Marcus Manilius Book 1 By the magic of song to draw down from heaven god-given skills and fate's confidants, the stars, which by the operation of divine reason diversify the chequered fortunes of mankind; and to be the first to stir with these new strains a the nodding leaf-capped woods of Helicon, as I bring novel offerings untold by any before me: this is my aim.

MANILIUS, Astronomica | Loeb Classical Library

Astronomica Book Two. Considering its technical nature the second book is very elegantly written: it deals with the two circles involved in every horoscope—the movable circle of the twelve zodiacal signs and the immovable circle of the twelve temples. First, however, we are regaled with an extended proem celebrating those poets who have inaugurated different genres of hexameter poetry; this ...
