The triangular graph template is ideal for printing and drawing by hand, but working in Excel is also an option. You can draw a 3-sided triangular graph, scaled as you like, to show data with 3 components summarized in one triangular graph. Use the triangular grid lines as a guide for scale when drawing your chart.

It would make a far more ambitious origami (apparently, it is made of 6433 triangles) but I can't find a net online. As it seems to be made with the classical icosahedron-decomposition method, I guess one can make one by hand. $\$ \endgroup \$$ - LIE Jan 20 '11 at 21:38

geometry - How to make a sphere-ish shape with triangle ...

To make a sphere out of paper strips, choose a thick paper like cardstock or construction paper and cut it into 12 strips that are half an inch wide and 6 inches long. Then, use a hole puncher to punch holes at both ends of each strip. With the strips all in one stack, place a metal paper fastener into the lined-up holes at either end of the stack.

Draw an equilateral triangle with 2-inch sides on the construction paper with the compass. Use a protractor to ensure the angles are each 60 degrees. Step 2 Place the pointed tip of the compass in the exact center of the triangle.

How to Make a Sphere Out of Paper | eHow

Spherical polygons. A spherical polygon is a polygon on the surface of the sphere defined by a number of great-circle arcs, which are the intersection of the surface with planes through the centre of the sphere. Such polygons may have any number of sides. Two planes define a lune, also called a "digon" or bi-angle, the two-sided analogue of the triangle: a familiar example is the curved surface ...
