All our structural investigations are conducted by in-house experts using highly specialist techniques dependent on the nature of the structure and the requirements of the investigation. The structural investigation team specialises in intrusive survey techniques such as diamond coring and drilling techniques. Through the latest non-intrusive techniques, such as muon tomography, we can identify potentially problematic features such as hidden shafts in tunnels, construction voids and hidden ...

Historic masonry buildings are durable and longstanding; restoring, repairing, rehabilitating, and maintaining these facades is important to preserving our communities' and our nation's historic fabric. Projects should include a holistic document review and condition assessment to understand the type of masonry wall system, the masonry and mortar materials, and the conditions of the facade elements and materials.

## **Historic Masonry Restoration Best Practices - Masonry Magazine**

Historic properties are not exempt from the Americans with Disabilities Act (ADA) requirements. To the greatest extent possible, historic buildings must be as accessible as non-historic buildings. However, it may not be possible for some historic properties to meet the general accessibility requirements.
