Systems Analysis and Design is a complex and stimulating process used by a team of business managers and systems professionals to develop and maintain information systems. Systems Analysis and Design should be viewed as an organizational improvement process. Systems are developed and maintained for organizational benefits. While advances in information technology provides new opportunities, the design of information systems is driven from an organizational perspective.

Systems Analysis and Design

In previous semesters we have used "Modern Systems Analysis and Design," J. A. Hoffer, J. F. George, J. S. Valacich, Prentice Hall. A copy of this book is in the BC lab and available for use while you're in the lab if you want an additional source of information about analysis and design.

Syllabus: Systems Analysis and Design

Success in systems analysis and design requires not only skills in methodologies and techniques but also in the management of projects: time, resources, and risks. Thus, learning systems analysis and design requires a thorough understanding of the process as well as the techniques and deliverables of the profession.
