Abstract. ‘The Industrial Revolution’ shows that the period from 1760 to 1850 was a turning point in world history, for it inaugurated the era of sustained economic growth. Technological change was the motor of the Industrial Revolution, but why did it happen in England rather than the Netherlands, France, China or India?

3. The Industrial Revolution - Very Short Introductions

The Industrial Revolution, now also known as the First Industrial Revolution, was the transition to new manufacturing processes in Europe and the United States, in the period from about 1760 to sometime between 1820 and 1840. This transition included going from hand production methods to machines, new chemical manufacturing and iron production processes, the increasing use of steam power and ...
