Working the Plate: The Art of Food Presentation ...

Despite its disadvantages, wet plate collodion became enormously popular. It was used for portraiture, landscape work, architectural photography and art photography. [citation needed] The largest collodion glass plate negatives produced in the nineteenth century were made in Sydney, Australia, in 1875. They were made by the professional ...

Collodion process - Wikipedia

The first step is to prepare the plate, which involves polishing and cleaning, so that there are no

marks or scratches on the surface that could interfere with the artist's drawing. The second step would be applying a ground to the plate. Hard ground is typically made from asphaltum, wax, and rosin.

Intaglio process (video) | Printmaking | Khan Academy

It takes you through eight different approaches to the plate. There are photographs of the finished plate, and some accompanying how-to help, also with photographs. Don't expect recipes! It's not a recipe book. The only recipes you get are there to help you through the plating experience. One reviewer accuses the book of being dated.

Working the Plate: The Art of Food Presentation: Amazon.co ...

In pure etching, a metal plate (usually copper, zinc, or steel) is covered with a waxy or acrylic ground. The artist then draws through the ground with a pointed etching needle, exposing the metal. The plate is then etched by dipping it in a bath of etchant (e.g. nitric acid or ferric chloride). The etchant "bites" into the exposed metal, leaving behind lines in the plate.

Printmaking - Wikipedia

The practice of making prints from etched metal plates grew out of the custom of etching designs on armour and was adopted by printmakers as an easy way of engraving, a process of making prints from metal plates incised with a tool called a burin. The first dated etching was made in 1513 by the Swiss artist Urs Graf, who

SAVING YOUR PLATE Once you are finished printing you may save the plate to work with later by cleaning it down with the Finisher/Cleaner: 1. Put on gloves and turn on the vent. 2. Apply a small dollop of Finisher/Cleaner and work over the plate with a rag.

Photolithography / Positive Working Litho Plates

In the translation and re-working of historic fabric pattern to the ceramic surface of a group of plates, RENDER becomes an exploration of the relationship between the historic and the contemporary with artworks crossing over categories of decorative art, design and fine art. Through shift in scale, color and context, the compositions of plates both abstract and highlight aspects of the textile patterns, encouraging a new dialog in pattern.
